

Usability Testing 2

Feedback and Solutions

Top Priority: Delivering a complete project.

We understand that we have only 1 week left so please help us to prioritize features that are most important.

Location Selector: difficult on smaller/low res screens, need more info on rooms, format confusing, floor select not obvious

Lag Time in Create Interface:
multiple post clicks → multiple meetings,
need immediate response

Solution:
Disable button upon click
change text to “Posting...” or loading gif

General UI:

The screenshot shows the Cornell Meeting Finder website. At the top, there's a red header bar with the Cornell University logo and the text "Cornell Meeting Finder at Mann Library". On the right side of the header are links for "Change Picture" and "Home". Below the header is a photograph of students studying in a library. Overlaid on the image are several blue speech bubbles containing annotations:

- A large blue speech bubble on the left points to the "Create" and "Search" buttons in the navigation bar, with the text "Home Tab".
- A smaller blue speech bubble next to it points to the "About, Help, ..." link in the navigation bar.
- A blue speech bubble on the right side of the image points to the "Shrink height" button in the bottom right corner of the main content area.
- A large blue speech bubble at the bottom left points to the "Create" button in the "Current Meetings" section, with the text "Create also takes you back to current meetings".
- A blue speech bubble on the right side of the "Current Meetings" section points to the "Shrink height" button in the bottom right corner of that section.
- A blue speech bubble at the bottom right points to the "Customize" link in the "Current Meetings" section, with the text "Better filters, sorting".

The "Current Meetings" section includes a "5 to show:" dropdown set to 5, and links for "Today", "This Week", and "Customize". There are also "Open to everyone" and "Everyone can edit" buttons. The "Meetings" section lists several items with times like "4:40 PM - 5:00 PM" and "4:40 PM - 5:00 PM".

Users had trouble locating functions
(home, search, current meetings).

View:

Some bugs were noticed and sharing features were not obvious to some users.

Add icons for clarity

Generally, users want to be able to perform an action in this window. Adding “copy to clipboard” could do that for now.

Doodle
UI:

The image shows the Doodle UI interface. It features a large text area with a border containing a "Participation link" and instructions to "Send this link to anyone you wish to invite." Below this is a blue link: "http://doodle.com/poll/a3xsep97pnvu3cqm". To the right of the link is a "Copy link" button with a clipboard icon. A green notification bar at the bottom of the text area says "This link has been copied to the clipboard." At the bottom left, there's an "Invite by e-mail" button with an envelope icon.
